

CS Series

Sanitary Centrifugal Pumps

The pumps serial CS are centrifugal pumps specifically designed for the foodstuff, pharmaceutical, chemical and water treatment industries.

- Modular components.
- Parts in contact with the fluid are manufactured in stainless steel type SUS 304, SUS 316 or SUS 316L.
- Lost-wax casting and electro-chemical polishing ensure perfect surface finishing levels.
- On request special finishing with Ra up to 0.5 micron can be obtained.
- Designed and manufactured to ensure the elimination of stagnation zones and ideal for CIP cleaning cycles.
- Chemical polishing treatment.
- Delivers from 0-333 Lpm with heads up to 24m.
- Thanks to the clamp sealing of the casing the pumps are easily dissembled for inspection, cleaning and maintenance purposes; the delivery port can also be turned in all directions.
- For particular aggressive environments the CS pumps can be manufactured in the following materials on request.

MODEL	FLOW (Lpm)	HEAD (m)	INLET (mm)	OUTLET (mm)	POWER (HP)	RPM	DIMENSION (mm)	WEIGHT (kg)
CS-10	50	18	40	32	1 HP	2850	450X240X330	31
CS-20	83.3	24	50	40	2 HP	2850	520X310X330	42
CS-30	166.6	24	50	50	3 HP	2850	560X320X380	47
CS-50	333.3	24	65	50	5 HP	2850	600X340X440	50
